

**LIST OF TOPICS (DATES ARE TENTATIVE)**

1.1 Equally likely outcomes .....	Jan. 9
1.3 Distributions .....	Jan. 11
1.3 .....	Jan. 13
MLK .....	Jan. 16
1.4 Conditional probability and independence.....	Jan. 18
1.5 Bayes' rule .....	Jan. 20
1.6 Sequences of events .....	Jan. 23
2.1 Binomial distributions .....	Jan. 25
2.2 Normal approximation.....	Jan. 27
2.4 Poisson approximation.....	Jan. 30
2.5 Random sampling .....	Feb. 1
3.1 Random variables .....	Feb. 3
3.2 Expectation .....	Feb. 6
Probability generating function .....	Feb. 8
3.3 Standard deviation and normal approximation .....	Feb. 10
3.4 Discrete distributions .....	Feb. 13
3.5 The Poisson approximation .....	Feb. 15
3.6 Symmetry .....	Feb. 17
Review I .....	Feb. 20
<b>MIDTERM I .....</b>	<b>Feb. 22</b>
4.1 Probability densities .....	Feb. 24
4.2 Exponential and Gamma distributions .....	Feb. 27
Moment generating function .....	Mar. 1
4.3 Hazard rates .....	Mar. 3
4.4 Change of variable .....	Mar. 6
4.5 Cumulative Distribution Functions .....	Mar. 8
4.6 Order statistics .....	Mar. 10
Spring break .....	Mar. 13-17
5.1 Uniform distributions .....	Mar. 20
5.2 Densities .....	Mar. 22
5.3 Independent Normal variables.....	Mar. 24
5.4 Operations .....	Mar. 27
5.5 .....	Mar. 29
6.1 Conditional distributions: discrete case .....	Mar. 31
6.2 Conditional expectation: discrete case .....	April. 3
6.3 Conditioning: density case .....	April. 5
6.4 Covariance and correlation .....	April. 7
6.5 Bivariate normal .....	April. 10
Review II .....	April. 12
<b>MIDTERM II .....</b>	<b>April. 14</b>

Chi-square .....	April. 17
Chi-square .....	April. 19
Chi-square .....	April. 21
Final review .....	April. 24
<b>FINAL EXAM .....</b>	<b>April</b>

## REFERENCES
