

Mathematics 5590H (Au), 5591H, (Sp) Honors Abstract Algebra I Honors Abstract Algebra II 5 credits each

Catalog Description:

5590H and 5591H includes elementary number theory, group theory, ring theory, abstract linear algebra, field theory, and Galois theory.

Prerequisite:

5590H: C or better in 5520H or in 520H, or permission of department.

5591H: C or better in 5590H or permission of department.

Text:

Vary, for example:

- <u>Abstract Algebra</u>, 3rd edition, by Dummit & Foote, published by Wiley, ISBN: 9780471433349
- Algebra, by M. Artin
- *Topics in Algebra*, by I. Herstein

Topics List:

5590H:

- 1. Integers, unique factorization; congruences, Euler function.
- 2. Groups, subgroups, homomorphisms and isomorphisms, normal subgroups, quotient groups, permutation groups, cyclic groups, Cauchy Theorems, Sylow's Theorems; direct products, fundamental theorem for finite Abelian group; G-sets.
- 3. Rings, subrings, ideals, morphisms, polynomial rings, prime and maximal ideals.
- 4. Commutative rings, factorization theory, Euclidean rings, principal ideal rings, unique factorization domains, Gauss' lemma; illustrations in the integers of quadratic number fields.
- 5. Modules over commutative rings, submodules, quotients and direct sums; fundamental theorem for modules over principal ideal domains.

5591H:

- 1. Vector spaces (as a special case of modules); linear maps and matrices, canonical forms, dual spaces.
- 2. The theory of determinants.
- 3. Bilinear and quadratic forms; inner product and unitary spaces; principal axis theorem.
- 4. Fields, algebraic and transcendental (extensions), existence of closure (over countable fields), tests for polynomial irreducibility; normality, separability, field automorphisms.
- 5. Galois theory, the subgroup-subfield correspondence theorem, group theory interrelations; extensions of finite fields, cyclotomic extensions.
- 6. Solvable groups and solvability by radicals.
