Goals: To study the conceptual foundations of precalculus mathematics and to develop the computational and problem-solving skills needed for that purpose.

Learning objectives:

- Understanding the basic properties of “elementary” functions: polynomial, rational, exponential, logarithmic, trigonometric, and inverse trigonometric functions; modeling real-life situations in terms of these functions.
- Introduction to vectors and sequences.

**COURSE GRADE:** Your final grade will be based on your recitation score, midterms scores, and final exam score. The point values for each are given below.

**Total Possible Points:**

**RECITATION:** .....100 points (Quizzes: 70 points & Homework: 30 points)
