Let’s play a game!

**Instructions:**

- A queen can attack in a straight line vertically, horizontally, or diagonally.

- During this game we place queens on chessboards so that no queen can attack another.

- Here an example of 3 queens on a 4x4 board.

Could you place 4 queens on a 4x4 board?

How many queens can you place on larger boards like 5x5 and 6x6?
