

Math Course List Format Instructions

- * Group your advanced math courses by general subject area (at least the top 2 or 3 areas):
 - For the PhD theoretical track, please order as:
Analysis, algebra, further pure math, applied math, other.
 - For the PhD applied track, please use:
Analysis, computational/numeric math, differential equations, linear algebra, other.
 - For the MAQRM program, please use:
Actuarial/financial math, other.

- * Within each subject area, please list your classes in reverse chronological order (i.e. most recent first).

- * Grades, School, Term, Level, etc. should be indicated for each class.

- * Clear content description: List of books/authors and covered chapters and topics. If that is not available, a list of topics should at least be included.

- * Information for a given course should all be on the same page and not spread over several pages.
